CONTENTS VOLUME 65 JANUARY 1984

page 1 TRAUB, P. and VORGIAS, C. E. Differential effect of arginine modification with 1,2-cyclohexanedione on the capacity of vimentin and desmin to assemble into intermediate filaments and to bind to nucleic acids

21 SCHAAP, C. J. and FORER, A. Video digitizer analysis of birefringence along the lengths of single chromosomal spindle fibres. I. Description of the system and general results

41 SCHAAP, C. J. and FORER, A. Video digitizer analysis of birefringence along the lengths of single chromosomal spindle fibres. II. Crane-fly spermatocyte chromosomal spindle fibres are not temperature-labile

61 GRINNELL, F. Manganese-dependent cell–substratum adhesion

73 BOLOUKHÈRE, M. Ultrastructural localization of nucleolar organizers during oogenesis in *Xenopus laevis* using a silver technique

95 MUKHERJEE, A. S. and CHATTERJEE, C. Activation of potential initiation sites of DNA replication and induction of new initiation within the same cycle by puromycin in *Drosophila* polytene chromosomes

111 DOHRMANN, U., FISHER, P. R., BRÜDERLEIN, M. and WILLIAMS, K. L. Transitions in *Dictyostelium discoideum* behaviour: influence of calcium and fluoride on slug phototaxis and thermotaxis

123 BELMONT, A., KENDALL, F. M. and NICOLINI, C. Three-dimensional intranuclear DNA organization *in situ*: three states of condensation and their redistribution as a function of nuclear size near the G_1–S border in HeLa S-3 cells

139 MCCOY, J. P., LLOYD, R. V., WICHA, M. S. and VARANI, J. Identification of a laminin-like substance on the surface of high-malignant murine fibrosarcoma cells

153 BARNETT, A. and STEERS, E. JR Antibody-induced membrane fusion in *Paramecium*

163 KARATZA, C., STEIN, W. D. and SHALL, S. Kinetics of *in vitro* ageing of mouse embryo fibroblasts

177 KATZIN, W. E. and GERSHMAN, H. Control of cell mobility by cyclic AMP

193 RUSSELL, D. G. and BURNS, R. G. The polar ring of coccidian sporozoites: a unique microtubule-organizing centre

209 EDWARDSON, J. M. Effects of monensin on the processing and intracellular transport of influenza virus haemagglutinin in infected MDCK cells

223 NAKAOKA, Y., TANAKA, H. and OOSAWA, F. Ca^{2+}-dependent regulation of beat frequency of cilia in *Paramecium*

233 MILLETTE, C. F. and SCOTT, B. K. Identification of spermatogenic cell plasma membrane glycoproteins by two-dimensional electrophoresis and lectin blotting

249 GOETZ, P., CHANDLEY, A. C. and SPEED, R. M. Morphological and temporal sequence of meiotic prophase development at puberty in the male mouse

265 RAHAT, M. and REICH, V. Intracellular infection of aposymbiotic *Hydra viridis* by a foreign free-living *Chlorella* sp: initiation of a stable symbiosis

279 ADLAKHA, R. C., WANG, Y. C., WRIGHT, D. A., SAHASRABUDDHE, C. G., BIGO, H. and RAO, P. N. Inactivation of mitotic factors by ultraviolet irradiation of HeLa cells in mitosis
